

Function Introduction of Clone2go Series

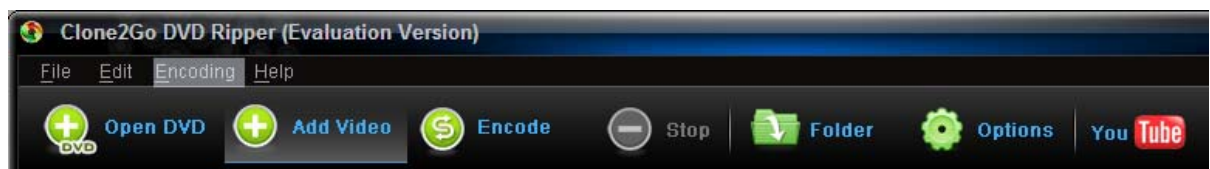

As the function and use of Clone2Go series software are the same or very similar, we will take Clone2Go DVD Ripper as an example and illustrate its function and use. For more information about excellent tools and technical support, please visit: <http://www.clone2go.com>

Below is the main window of Clone2Go DVD Ripper

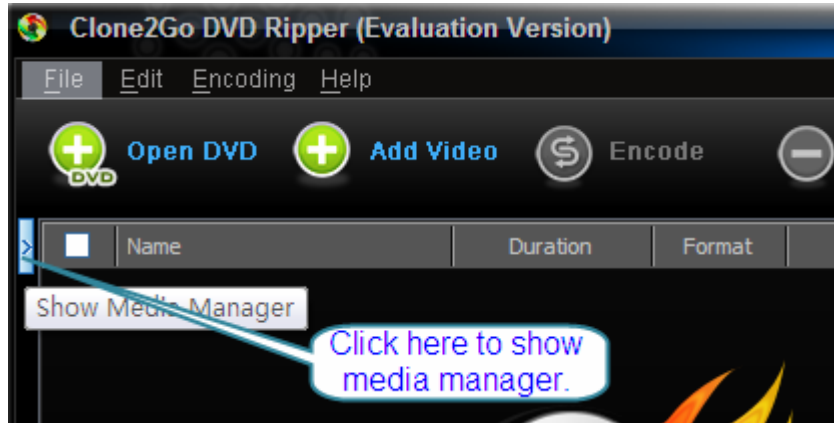

The main window of Clone2Go DVD Ripper has several parts:

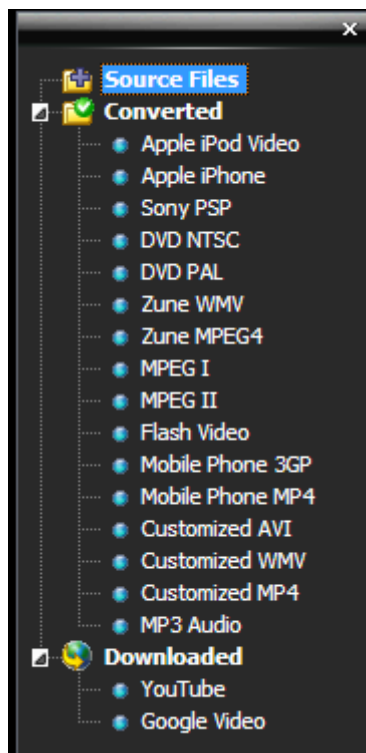

The upper window includes the top menu and shortcut buttons, as shown in the picture below.

The left window is Media Manager. Refer to the following picture about the way to show Media Manager, as shown in the picture below.

--The left window Media Manager lists files in three folders: Source Files, Converted and Downloaded, as shown in the picture below.

Source Files: Click it and you will see the video files you have added for conversion.

Converted: Click relevant option of output format and you will see the converted files in that option folder.

Downloaded: You can see the videos you have downloaded from YouTube and Google in this folder.

In the upper middle of the window, you may see the list, which displays all videos you have added and all that converted. In the list, you can get the detail about the video files such as file name, duration, format, video size and time created, as shown in the picture below.

<input checked="" type="checkbox"/>	Name	Duration	Format	Video Size	FPS	Status
<input checked="" type="checkbox"/>	2.rmvb	00:05:01	RV40	320x240	15 fps	
<input checked="" type="checkbox"/>	1.rm	00:04:47	RV40	320x240	15 fps	

The top right window is the mini player where you can preview the movie and select the part of the video to trim, as shown in the picture below.

You can double click the screen to enlarge display size in "stop" mode. Double click again to go back the normal size, as shown in the picture below.

The bottom right of the window displays the settings of the selected video files. You can customize the property of the output files here such as output duration, video size, video bitrate and audio bitrate, as shown in the picture below.
