

How to Convert WLMP to WMV/MP4/AVI/FLV/3GP

What is WLMP?

A *.WLMP is a movie project file created by Windows Live Movie Maker, a program that allows users to create their own movies and slideshows with transitions, music, effects, etc. WLMP files can be exported to .WMV files, published to Windows Live SkyDrive, Facebook, YouTube, and Flickr, and burned to DVDs.

NOTE: WLMP files are not video files. They are project files used to create videos.

This article will show you how to convert WLMP to WMV, AVI, MP4, FLV and other popular video formats.

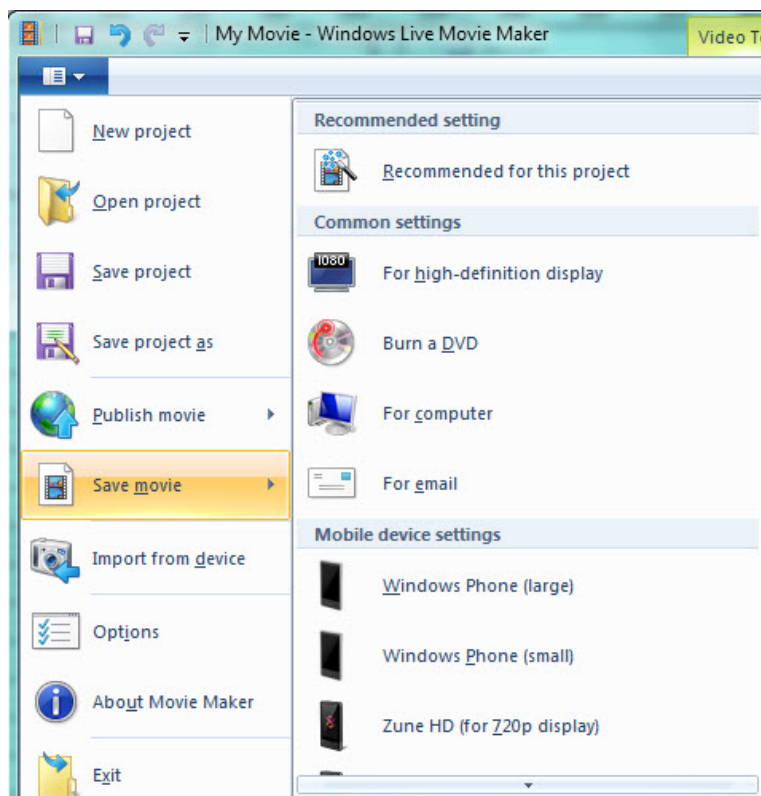

The tool you need is **Clone2Go Video Converter**.

<http://www.clone2go.com/products/videoconverter.php>

1. Convert WLMP to WMV in Windows Live Movie Maker

You first open the *.WLMP file in Windows Live Movie Maker by clicking "File -> Open Project".

To convert WLMP to WMV, you just click "File -> Save movie" and then choose a profile to fit your needs.

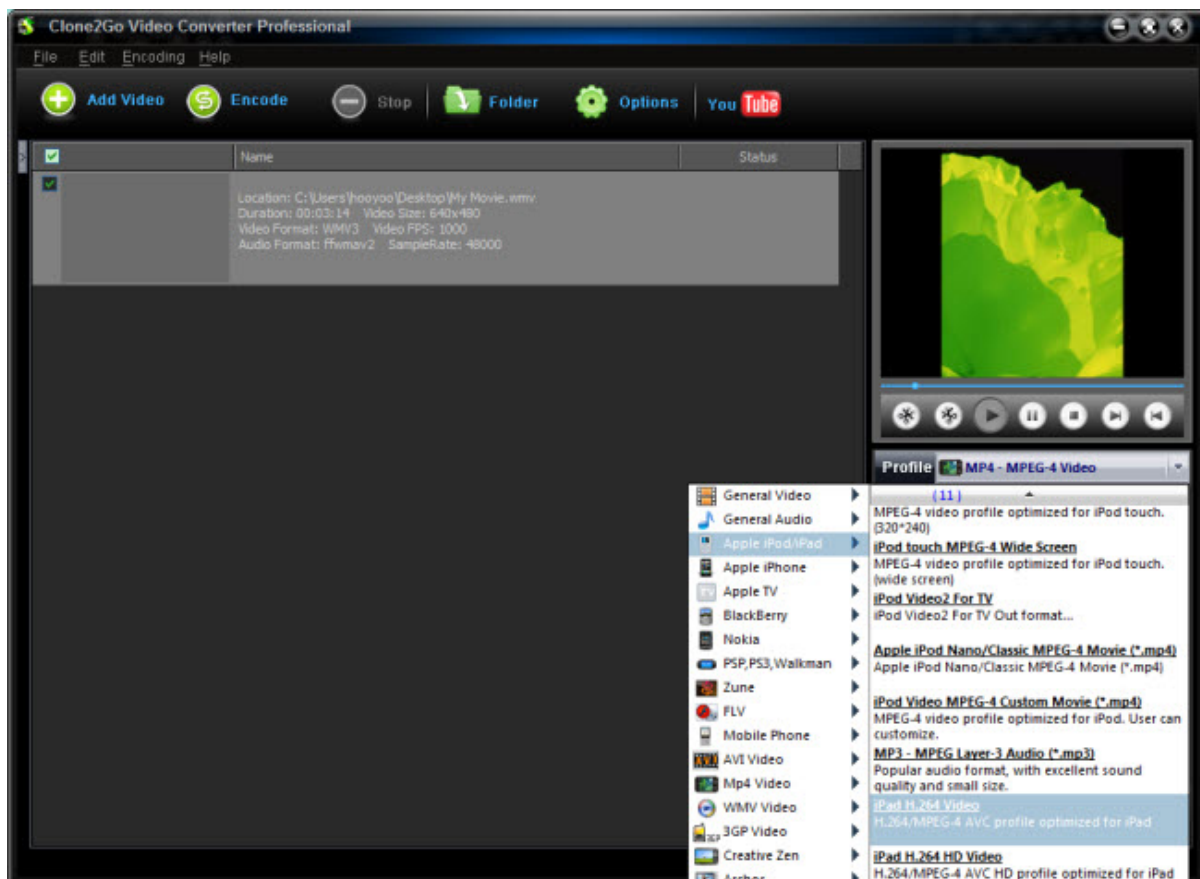

Then Windows Live Movie Maker will ask you to enter a file name for your movie and choose a folder to save your movie. The movie will be saved as a WMV file in the PC.

2. Convert WLMP to MP4, AVI, FLV, 3GP

After you have saved the WLMP file to your computer hard drive as WMV video, you can now begin to convert the WMV file to the specific video format you need.

The software you need is Clone2Go Video Converter.

The steps are quite simple:

- a. Import the WMV file to the program.
- b. Choose an output format. For example, if you want to watch the movie on iPad, you can choose "iPad MPEG-4 Video" as the output format.
- c. Start to convert.
