

How to rip DVD to Flash, convert DVD and video to SWF?

Source from <http://www.clone2go.com>

The following is the step by step tutorial that shows you how to rip DVD to SWF format, convert DVD to Flash and video to Flash.

You will need [Clone2Go DVD Ripper](#), which can be downloaded from <http://www.clone2go.com>. Below is the screenshot of Clone2Go DVD Ripper:

Note: If you want to rip DVD to FLV format, convert DVD to FLV and video to FLV, you can head to: [How to rip DVD to YouTube FLV video?](#)

Below are the detailed steps about how to convert DVD and video to SWF using Clone2Go DVD Ripper:

Step 1. Import DVD movies and video files

Insert the DVD disc into the disc drive, click the "Open DVD" button to import it if you are going to convert the DVD movie to SWF. Or if the DVD movie is saved as a folder on your computer, you need to click the "Add Video" button to locate that

folder, which is composed of two separate folders: VIDEO_TS and AUDIO_TS. From the VIDEO_TS folder, select the .vob file to import and then click "OK".

You can also import video files stored on your PC by clicking the "Add Video" button. The supporting formats are shown as follows:

Audio Files (*.mp2, *.mp3, *.wav)

Windows Media Files (*.avi, *.wmv, *.asf, *dvr-ms, *ms-dvr)

MOV/MP4 Files (*.mov, *.mp4, *.3gp, *.m4v, *.qt)

Real Media Files (*.rm, *.rmvb)

Flash Video Files (*.flv)

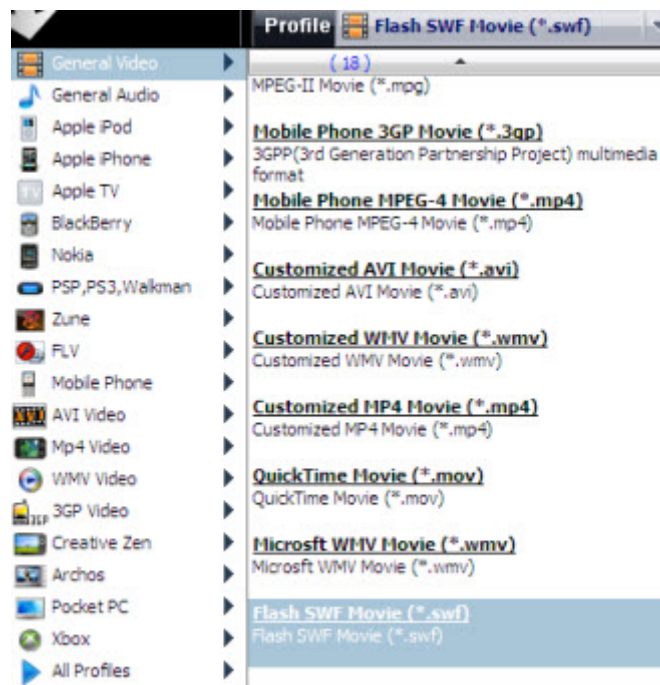

MKV Video Files (*.mkv)

AviSynth Scripts (*.avs)

Other Video Files (*.mpg, *.vob, *.dv, *.m1v, *.m2v, *.dat, *.amv)

Step 2. Choose the output format

From the drop-down list of "Profile", navigate to the "General Video" category. From the sub-category, you can choose the most appropriate output format.

Note: From the profile graph above, we can learn Clone2Go [DVD Ripper](#) also applies to ripping DVD movies and converting video to video/audio formats for iPod, iPhone, PSP, Zune, BlackBerry, Nokia, PS3, etc.

Step 3. Start to encode

Now you can click the "Start Encode" button to starting converting DVD and video to SWF.

Note: The output SWF files are easily available by clicking the "Folder" button on the main menu after the ripping/converting process is done.

Below are several additional tips:

Tip 1. Trim the video

If you only need a certain part of the DVD/video, you can drag the "Start to trim" and "Stop to trim" buttons to get the DVD/video clip after it is imported.

You can also specify the "Start Time" and "Stop time" at the bottom right panel of the interface (under "Profile").

To know more about how to trim the DVD and video length, you can head to: [How to trim DVD/video/audio length?](#)

Tip 2. Download YouTube videos

Clone2Go DVD Ripper also allows you to download YouTube videos. Here is the tutorial: [How to download YouTube videos for free?](#)

Tip 3. Customize profile

If you are still not satisfied with the profile you choose, you can customize the parameters such as video codec, video size, video bitrate, video framerate, audio bitrate, audio sample rate, etc.

To know more about how to customize profile, you can head to: [How to customize profile for the output file?](#)

Tip 4. Batch import and convert DVDs/videos

Clone2Go DVD Ripper allows you to batch import DVD movies and video files and batch convert DVD movies and video files as well.
