

How to free transfer music and video from iPod iPhone to PC

Source from <http://www.clone2go.com>

It is very easy to transfer DVD movies and video files to iPod and iPhone. You just need to get a software tool to convert the DVD movies and video files to the video/audio format your iPod/iPhone recognizes.

A perfect choice is Clone2Go [DVD to iPod Converter](#), which combines three main features into one program:

- 1) Rip DVD's to iPod,
- 2) Convert videos to iPod,
- 3) Download YouTubes videos to iPod.

Plus, it supports all kinds of iPod/iPhone players including iPod touch, iPod classic, iPod nano, iPod video, iPod shuffle, 3G iPhone, etc.

After you get the output iPod/iPhone compatible video/audio files from your DVD movies or video files with this DVD to iPod Converter, you just add the video/audio files to your iTunes and then drag them to your iPod/iPhone with the sync of iTunes Library. Here is the step by step guide: [How to convert DVD and video to iPod](#).

However, suppose you had to reinstall the operating system or iTunes on a computer after a crash, you may want to transfer the music and video collections back to the computer from iPod or iPhone. Or you just want to backup the music and video files from your iPod or iPhone to your computer hard drive. Don't worry, there are lots of freewares tools designed for copying media files from iPod/iPhone to PC. So, I'd like to introduces several handy iPod/iPhone to PC tools below:
